Professional Summary

Computer Science undergraduate with foundational knowledge in DevOps, CI/CD pipelines, Docker, Git, and Linux. Skilled in Java and SQL with hands-on experience in automation, version control, and cloud-native technologies through academic projects and self-learning. Passionate about modern software delivery practices and eager to build a career in DevOps and Cloud Engineering.

Education

B.Tech - Computer Science And Engineering

Institute Of Engineering And Management, Kolkata

2023 - Present
CGPA: 8.854 (Currently pursuing)

ISC (Class XII)

Pramila Memorial Advanced School, Kolkata

2022 - 2023

89.33%

ICSE (Class X)

Pramila Memorial Institute, Kolkata

2020 - 2021

95.6%

Relevant Coursework

Core Subjects: Data Structures & Algorithms, DBMS, Operating Systems, Object-Oriented Programming, Computer Network, Cloud Computing, Software Engineering

Projects

Portfolio Website with CI/CD Pipeline | *HTML, CSS, JavaScript, Jenkins, Docker,* Jan 2026 – Feb 2026

GitHub, CodeSandbox

- Developed a fully responsive personal portfolio to showcase projects, skills, and achievements.
- Implemented dynamic UI features and added resume download functionality and structured contact section.
- Integrated project section with GitHub links and detailed descriptions.
- Containerized the application using Docker for portable execution.
- Implemented a CI/CD pipeline using Jenkins and GitHub integration.
- Built a Jenkins pipeline for Docker image build and container execution.

Fingerprint-Based Blood Group Detection | *Python, TensorFlow, CNN, GAN* Nov 2025 - Jan 2026

- Designed a non-invasive deep learning system to classify ABO and Rh blood groups using fingerprint images.
- Built a GAN-based data augmentation pipeline to address dataset scarcity and class imbalance across 8 blood groups.
- Trained a CNN classifier on real + GAN-generated fingerprint images, achieving **91% test accuracy**.

Technical Skills

Programming Languages: Java, Python, C.

DevOps & Cloud: Git, GitHub, Docker, Jenkins (Basics), CI/CD Concepts, Linux, CodeSandbox.

Web Development: HTML, CSS, JavaScript.

Tools & Practices: VS Code, MySQL Workbench.

Machine Learning and Deep Learning Models: CNN, GAN, Model Training, Data Augmentation.

Framework and Libraries: TensorFlow, Keras, NumPy, Pandas, Scikit-learn, Matplotlib.

Achievement & Responsibilities

- Ranked **13th** in B.Tech CSE (1st Year) among the cohort.
- Vice President Education, UEM Kolkata Toastmasters Club.
- Organizing Committee Member, Eutopia - The cultural and literary fest.
